Thuraya XT-PRO

Universally professional

THURAYA

The world's most advanced satellite phone

Designed for professional users, Thuraya XT-PRO is the world's most advanced satellite phone which is ruggedized and equipped with long battery life, ensuring connectivity no matter where you go.

The Thuraya XT-PRO is the first satellite phone with built-in GPS, Beidou and Glonass capability for highest flexibility in all regions. It has the biggest display on any satellite phone and comes with hardened Gorilla® glass for harsh environments. The screen is designed for glare resistance which allows for optimal visibility in bright sunlight and it includes a brightness sensor to automatically adjust the backlight of the display.

With the Thuraya XT-PRO you can make phone calls and send messages in satellite mode and also use a satellite data connection to send and receive emails or browse the web with a connected laptop or PC. For emergencies it has a dedicated SOS button with advanced navigation and tracking features.

No matter where you are within Thuraya's extensive coverage area, or how remote your location, we keep you connected. Thuraya's comprehensive satellite network provides reliable, clear and uninterrupted communications in more than 160 countries across Europe, Africa, Asia and Australia.

Features

Global Navigation Satellite System

For the first time on a satellite phone, you can select your preferred navigation system and choose between GPS, BeiDou and Glonass for highest flexibility wherever you may go.

Longest talk-time on any satellite phone

With a talk-time of up to 9 hours and a standby time of up to 100 hours the Thuraya XT-PRO enables reliable communications whenever you need it.

Glare resistant Gorilla® glass display

Toughened glass for harsh conditions and customized outdoor display for easy readability in direct sunlight, no matter how bright the conditions are.

Dedicated SOS button

The XT-PRO has a dedicated SOS button which is easy to use in times of distress. Even when the phone is switched off, simply press and hold the SOS button for 3 seconds. This starts the phone and triggers the emergency service (call and/or SMS) to any pre-programmed number.

Compact and rugged design

Small enough to easily fit in your pocket, the Thuraya XT-PRO is jet water and dust resistant as well as shock proof to withstand harsh environments.

Make calls, send SMS and connect your laptop or PC to access the Internet in satellite mode whenever there is no terrestrial network available.

Supported by the most robust and powerful satellite network

Thuraya's system is renowned for having the most reliable satellite network and the advanced omni-directional antenna of the Thuraya XT-PRO ensures an uninterrupted signal when walking or moving, offering full walk-and-talk capability.

The Thuraya XT-PRO also enables you to receive a call notification even if your satellite signal is too weak to receive the call itself. This is particularly useful when the Thuraya XT-PRO is in your pocket with the antenna stowed, keeping you connected at all times.

Additional features include: Speakerphone, address book, alarms, calculator, calendar, call logs, conference calls, contact groups, speed dialing, stopwatch, world time and many more.

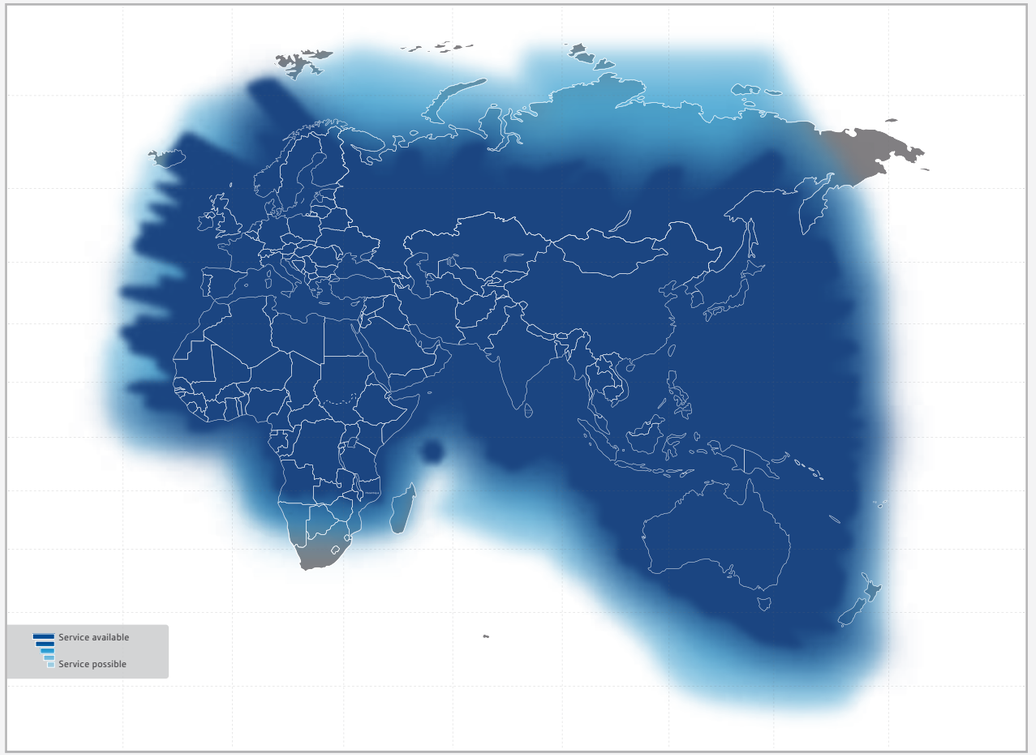

Thuraya's coverage area

The Thuraya XT-PRO enables you to stay connected via satellite mode from anywhere under the coverage area of Thuraya's satellite network, which extends across more than 160 countries in Europe, Africa, Asia and Australia. The phone works either with a Thuraya SIM card or with a GSM SIM card from any of the more than 360 Thuraya roaming partners worldwide.

Thuraya's congestion-free network automatically re-allocates network resource to any single spot beam, allowing the Thuraya XT-PRO users to enjoy uninterrupted connectivity beyond the reach of terrestrial communications and cellular networks.

Wherever your business operations take you, Thuraya XT-PRO provides the advantage of reliable satellite communications even in the most challenging environments and remote locations.

Thuraya XT-PRO – universally professional.

*Depends on phone usage and network conditions

Available accessories

Indoor Repeaters

With an Indoor Repeater, you will be able to use the Thuraya XT-PRO in indoor environments. It comes with external antennas and transmits the Thuraya network signal into a room/area without network coverage.

Fixed Docking Units

A Fixed Docking Unit is a home and office docking adapter that allows you to use the Thuraya XT-PRO like a desktop phone in an indoor setting.

Solar Chargers

Charge the Thuraya XT-PRO even in remote locations when you have no access to electricity.

Spare Car Chargers

A car charger ensures that the Thuraya XT-PRO is never out of power while you are on the move.

Spare Batteries

An additional battery serves as a backup for the Thuraya XT-PRO and extends usage time when you have no access to electricity.

Spare Travel Chargers (with EU/UK/CHN/AUS plugs)

The travel charger connects your phone to a mains socket. The exchangeable plugs allow charging in most parts of the world.

Spare USB Data Cables

With a USB data cable you can connect the Thuraya XT-PRO to a PC or laptop to access the Internet or upgrade your handset software.

Where to buy

The Thuraya XT-PRO is available through Thuraya's global service partners. Visit our website to find your local service partner: http://www.thuraya.com/where-to-buy
